- Relieve Tinnitus

CAUTIONS 1

Thank you for purchasing Hearprotek Sleep Earphones, please read below cautions before use for safety.

- Avoid continuous use of your earbuds at high volumes. Using at high volumes for prolonged periods of time can cause hearing damage. It is advised you keep volume levels moderate to low at all times for your safety.
- Do not use while driving a car, cycling, operating machinery, or performing other activities that require hearing surrounding sounds.
- Do not use any chemical solvents to clean.
- Avoid prolonged exposure to sunlight, high temperatures, dusty and humid environments.
- Avoid dropping or crushing the earbuds, stressing the cable by rapid pulling or extreme force, or bending the cable at a sharp angle.
- Wax may build up in the earbud tips, lowering the sound quality. Carefully remove the wax with a cotton swab or other small tool to improve the sound quality.
- If you experience discomfort or pain, try lowering the volume or discontinuing use temporarily.
- If you experience regular discomfort while using this product, discontinue use and consult your physician.

PACKAGE CONTENT 2

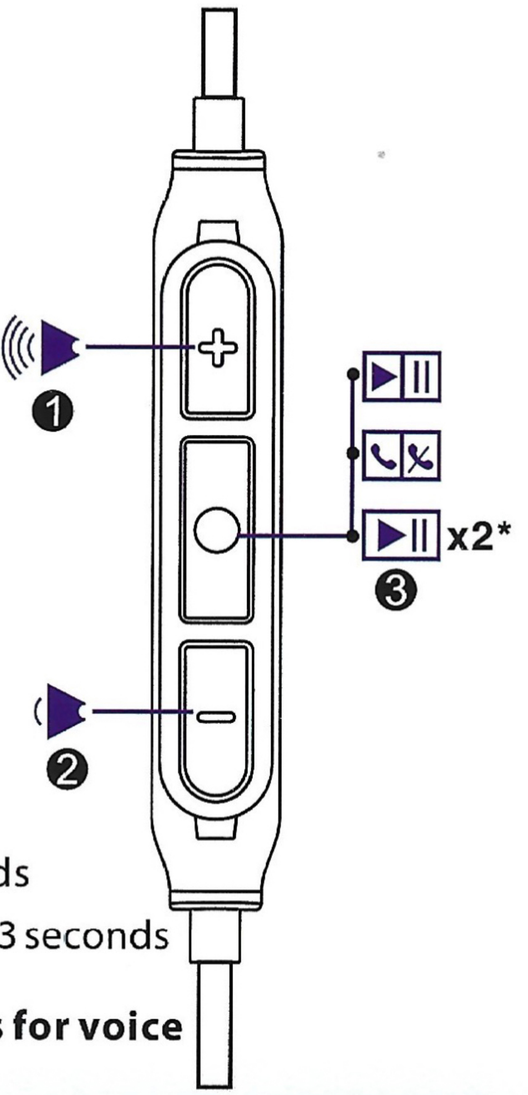
❸	End call:	Press MFB once
❸	Reject:	Hold MFB for 2 seconds
❸	Activate Voice Assistant:	Hold MFB for 3 seconds

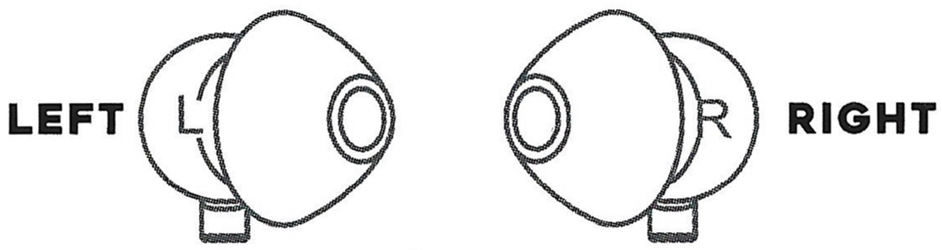


*** Voice Assistant feature only works for voice assistant enabled devices.**

Step 1 Please check the "R" and "L" labels on the earbuds.

Step 2 Put the earbuds into the corresponding ears.

Step 3 Try rotating the earbuds to make sure the earbuds fit comfortably and securely in the ear canal.



GETTING STARTED

Step 1 Plug this pair of earphones into your audio device with a 3.5 mm stereo jack.

Step 2 Turn on your audio device to enjoy the music.

CLEANING

Wipe the earbuds off with a damp cloth each time you wear them. Keep them stored in the carrying case included after use. Do not expose to extreme heat or moisture.

1.Q: No Sound coming from the earphones?

A: Check that the earphone is plugged in all the way, audio is playing, volume is at the appropriate level, and the device has not muted. Check another known working earphone to verify the issue.

2.Q: One channel has no sound?

A: Check to make sure the earphone plug is inserted all the way in the jack of the connected device. Try a different audio stream or file. Check another known working earphone to verify the issue.

3.Q: Sound is louder in one ear than the other?

A: There are several possible reasons:
-The song or source is not balanced, try another song or source.
-There is pressure buildup in your ear, release it by pulling back on the earphone housing, pulling the upper part of your ear to release the pressure.
-Swap the channels and see if you still hear an imbalance on the same side (i.e. put the left channel in your right ear and the right channel in your left ear).
-Your ear tip is not sealing properly, inspect in the ear tip for the tears and blockages and make sure it is installed properly.

4.Q: static or other noise when plug is moved?

A: If the plug or inside of the jack is not clean, you may hear static, clicking or other noise when the plug is moved, please clean the plug with a soft cloth or isopropyl alcohol to see if it's better. Please also check another device to see if there is the same problem.

WARRANTY

Hearprotek will repair or replace defective product at its option if returned within one year of purchase to our designated service facility. Please contact our customer support at support@hearprotek.com if you have any questions.
